

# Sex, Alcohol and Other Drugs: Exploring the links in young peoples lives

For many young people, sexual activity and the use of alcohol and other drugs are entwined, while the support and education we offer them often treats these issues in isolation. Drawing heavily on the perspectives of young people, professionals and research, Sex, Alcohol and Other Drugs provides a much needed foundation for developing policy and practice that is relevant to young peoples lives and addresses the issues in a holistic fashion. It explores young peoples opinions about the support they want, and the implications of this for policy and practice. Case studies and practical ideas are used throughout to illustrate how practitioners can address the links between sex, alcohol and other drugs with young people.

violence is contagious and interacts closely with other health issues.1 There wellbeing. This briefing paper is one of a series of five which explore public be causal links from young peoples alcohol and drug with reductions in overall crime, violent crime, sexual alcohol use among young people include Life Skills.
