

Basic and Clinical Pharmacology 12/E (LANGE Basic Science)

The most up-to-date, comprehensive, and authoritative pharmacology text in health medicine. Enhanced by more than three hundred illustrations -- many in full color.

Organized to reflect the syllabi in many pharmacology courses and in integrated curricula, Basic & Clinical Pharmacology, 12e covers the important concepts students need to know about the science of pharmacology and its application to clinical practice. Selection of the subject matter and order of its presentation are based on the authors' many years experience in teaching this material to thousands of medical, pharmacy, dental, podiatry, nursing, and other health science students. To be as clinically relevant as possible, the book includes sections that specifically address the clinical choice and use of drugs in patients and the monitoring of their effects, and case studies that introduce clinical problems in many chapters. Presented in full color and enhanced by more than three hundred illustrations, Basic & Clinical Pharmacology features numerous summary tables and diagrams that encapsulate important information. Coverage that spans every aspect of medical pharmacology:

- Basic principles
- Autonomic drugs
- Cardiovascular-renal drugs
- Drugs with important actions on smooth muscles
- Central nervous system drugs
- Drugs used to treat anemias, clotting disorders, hyperlipidemia, and inflammation and gout
- Endocrine drugs
- Chemotherapeutic and immunologic drugs
- Toxicology
- Special subjects (perinatal, geriatric, and dermatologic pharmacology)
- Botanical and food supplements, and over-the-counter medications
- Prescribing

Also in this edition:

- Drug Summary Tables conclude most chapters, providing a concise summary of the most important drugs.
- General concepts relating to newly discovered receptors, receptor mechanisms, and drug transporters.
- Descriptions of

important new drugs, including
monoclonal antibodies
