

# 2011 Graduate Programs in Physics, Astronomy, and Related Fields

This comprehensive compendium provides information on nearly every U.S. doctoral program in physics and astronomy, plus data on most major masters programs in these fields. Information on many major Canadian programs is also included. In addition, the Graduate Programs directory lists a substantial number of related-field departments, including materials science, electrical and nuclear engineering, meteorology, medical and chemical physics, geophysics, and oceanography. This print edition contains information valuable to students planning graduate study and faculty advisors, including each programs research expenditures and sources of support. A number of helpful appendices make navigating the directory a simple task.
