

Laboratory Urinalysis and Hematology for the Small Animal Practitioner (Made Easy Series)

This text is an essential guide to routinely performed laboratory procedures for urinalysis and hematology. It is designed for the person who is learning to, or actually performing routine Urinalysis and hematology laboratory procedures. It includes the basic information of how to collect, preserve, prepare, and examine specimens. It deals specifically with common findings in urinalysis and hematology and provides a comprehensive set of high quality images for on-the-spot reference. The book includes step-by-step procedures for both manual and automated testing of all blood components and detailed guidelines for microscopic analysis of urine sediment including crystals and casts. Care has been taken to insure that the crystal presentation is high quality in order to ease identification and a very helpful chart of these images is included. This title provides brief, precise, technical guidance for collecting, preserving, preparing and evaluation urine and blood sample in dogs and cats.
