

# His Excellency the Marquis of Lorne, & Governor-General of Canada, Upon the Present Commercial Policy of Great Britain and Its (Classic Reprint)

Free Trade (or Free Imports) in those articles which enter largely into the cost of British Manufactures, but whether the political economists who have directed the commercial policy of the nation for thirty years past have not, through their belief in and admiration of general principles, failed to attach due weight to the disturbing effect of other and artificial causes of great importance; and whether it is possible for England to prosper under a system whereby her markets are open to all the world, and those of many other countries practically closed to her, I have no thought of questioning the laws of Political Economy as generally laid down by our best writers, but I desire to draw a marked distinction between those laws and Free Trade, which I observe is constantly spoken of as if it were a principle in itself, instead of being a deduction only from sound principles, and if, a deduction, then necessarily subject to all the disturbing influences which may surround its application. The laws of Political Economy must be accepted by all mankind before any deduction from those laws can be capable of universal application. The division of the World into Nations, with all their varied differences in condition, character and laws,- their ambitions, jealousies and rivalries,- must always forbid the hope of any system of economical policy becoming cosmopolitan. Sound principles exist, but their influence must be modified by the distinct peculiarities which govern each Nation individually; and therefore the application of such principles falls rather within the sphere of the statesman than the philosopher, the object being to adhere as closely as disturbing circumstances will permit to admittedly sound laws of Political Economy, and thereby to secure the largest possible advantage for them, in the contest with other countries by whom those laws are violated (Typographical errors
