

Baby Steps: Facing Up To Fibromyalgia

Fibromyalgia is one of the most misunderstood, misdiagnosed conditions of modern medicine. It is chronic and without a cure. It causes pain when there is no inflammation or infection, it causes fatigue, loss of appetite, loss of sleep, even memory loss. This book is not a comprehensive study of the disease, it is one woman's experience; how she survives despite the debilitating symptoms.

Editorial Reviews. About the Author.
