

Networking Fundamentals Using Novell NetWare 4.11

Consisting of the second half of Data Communications and Networking Fundamentals Using Novell NetWare, this introduction to networking focuses on Novell's NetWare version 4.11 to illustrate local area network applications. The book features how-to and hands-on tutorials in the use of NetWare 4.11, the most popular LAN product. It explores the full spectrum of Novell NetWare 4.11 topics -- ranging from overview, through user creation, login script creation, printing, file system rights, Novell Directory Services rights, and troubleshooting. The book assumes a basic level of computer literacy equivalent to that gained in an introductory computer science course and for anyone interested in networking.
