In *The Awful End of Prince William the Silent*, series editor Lisa Jardine explores the historical ramifications of just such an instance, the first assassination of a head of state with a hand-held gun. The shooting of Prince William of Orange in the hallway of his Delft residence in July 1584 by a French Catholic the second attempt on his life had immediate political consequences: it was a serious setback for the Protestant cause in the Netherlands, as its forces fought for independence from the Catholic rule of the Hapsburg empire. But, as Jardine brilliantly illustrates, its implications for those in positions of power were even more far-reaching, as the assassination heralded the arrival of a lethal new threat to the security of nations a pistol that could be concealed and used to deadly effect at point-blank range. Queen Elizabeth I, Williams close Protestant ally, was devastated by his death and thrown into panic; in the aftermath of Williams death, legislation was enacted in the English parliament making it an offence to bring a pistol anywhere near a royal palace. Elizabeths terror was not misplaced as Jardine observes, this assassination was the first in a long and bloody line including those of Abraham Lincoln in 1865 and Archduke Ferdinand in 1914 and is all too relevant today.
